

Hugh Durrant-Whyte received the B.Sc. (Eng.) degree (1st class honours) in Nuclear Engineering from the University of London, U.K., in 1983, the M.S.E. and Ph.D. degrees, both in Systems Engineering, from the University of Pennsylvania, U.S.A., in 1985 and 1986, respectively. From 1987 to 1995, he was a Senior Lecturer in Engineering Science, the University of Oxford, U.K. and a Fellow of Oriel College Oxford. From 1995 to 2002 he was Professor of Mechatronic Engineering at the Department of Aerospace, Mechanical and Mechatronic Engineering, the University of Sydney, Australia, where he led the Australian Centre for Field Robotics (ACFR), a Commonwealth Key Centre of Teaching and Research. In 2002 he was made an Australian Research Council (ARC) Federation Fellow. He is also Research Director of the ARC Centre of Excellence for Autonomous Systems, based at University of Sydney. His research work focuses on autonomous vehicle navigation and decentralised data fusion methods. His work in applications includes automation in cargo handling, surface and underground mining, defence, unmanned flight vehicles and autonomous sub-sea vehicles. He has published over 270 technical papers and won numerous awards for his work including three IEEE best paper prizes, UK Engineer of the year (1994), and the BHERT (2000) award for innovation in collaborative R&D.
